Trial Dining Areas in the Department Building

Hi everyone,

Mice have become more noticeable in the Library and Information Building recently. To keep them from chewing on important equipment or the wires in the server room, the Office of Library & Information Services (OLIS) has arranged for a pest control company to set up mouse traps this Friday (11/20) and will keep tracking the results. To support this, we will try the following measures for dining spaces in the department building. Thank you for your cooperation!

1. Trial Period

Monday, November 23, 2026 until the end of this semester

2. Dining Areas and Hours

- Inside the 3F access control gate: The sofa area at the Department Office (Room 3001), 12:00–12:30
- Outside the 3F access control gate: Classroom 3015, 12:00–12:50

Note: On Wednesday, 11/25, the dining area will be moved to Classroom 3016. At all other times, it will be Classroom 3015.

Note: Eating and drinking are not allowed in all other classrooms, laboratories, and the central island area (中島空間) on the 3rd floor.

3. Friendly Reminders

- Before the opening hours end, please clean up the area yourself. Take your belongings and trash with you and leave the space empty, so that the cleaning staff can check it before the afternoon classes begin.
- Outside these areas and hours, if you need to eat, please use the coffee corner outside the 3F access control gate, or other food-friendly spaces on campus.

4. What's Next

If the dining areas stay clean during the trial and students respond well, we plan to continue this next semester.

Thank you for your cooperation, and let's keep the space clean together!
